PROJECTS

Lapify.com
Apr 2025 - May 2025

Developed a responsive second-hand laptop selling platform aimed at helping students purchase affordable, well-maintained laptops.
- Built using React.js, HTML, CSS, JavaScript, and Vite , and Mongo DB .
- Focused on user-friendly UI and seamless product listing and browsing experience.
- Addressed real-world student needs by enabling budget-conscious tech purchases.

E-Commerce
Jun 2024 - Jul 2024

Designed a user interface for an E-Commerce product booking platform using Figma.
- Focused on creating an attractive and intuitive user flow for product selection, cart management, and order placement.
- Applied modern UI/UX principles to enhance usability and user engagement.

Board Wiper
May 2023 - Jul 2023

Developed a motorized board wiper to assist teachers in cleaning whiteboards efficiently and avoid exposure to chalk dust.
- Designed as a classroom aid to automate board cleaning and save time.
- Aimed to improve health and teaching comfort for educators by eliminating manual cleaning with traditional dusters.
